Microparticles of plastics are being absorbed by fish that are then eaten by humans

The amount of plastic generated globally is estimated to be nearly 6.3 billion tonnes

Plastic can take up to 500 years to decompose

INNOVATION HAS ALWAYS BEEN AT THE CORE OF UTOPIA'S OFFERING, AND AS WE HAVE SEEN AND BEEN PART OF THE WAVE OF THE MOVEMENT TOWARDS ECO-FRIENDLY ALTERNATIVES TO SINGLE USE ITEMS WE SAW A FIT FOR WHAT WE CAN OFFER.

Straws and stirrers when in plastic were seen as a bland commodity, adding little value to the serve and even less to the environment, but with other materials there is the opportunity to differentiate and add value to the serve through the patterns, colour and variations that can be achieved.

Our range is focused on bringing the best product into the market, meeting all the environmental needs whilst giving our customers a way to create innovative serves through our extensive range of straws, skewers and stirrers.

#### WHAT ARE WE DOING TO HELP?

AFTER MONTHS OF CONSULTATIONS OUR RANGE OF PAPER STRAWS HAVE NOW RECEIVED: EN13432:2000 ACCREDITATION

This certification specifically focuses on compostability making sure Utopia's non metallic paper straws adhere to strict standards concerning biodegrading so they only have a positive impact on the environment. In other words they actually give something back to the earth when their useful life is over.

ALL OUR WOODEN STIRRERS AND PAPERS HAVE BEEN FSC SOURCED

## ACTIONS WE HAVE TAKEN

For our paper and wood products, it is key that they are compostable, biodegradable and food safe, without this they are not fulfilling the need to be environmentally friendly and improve the position from single-use plastics. We rigorously test our products to make sure they adhere to these requirements.

For paper to be environmentally friendly it needs to adhere to the Forest Stewardship Council certification, which gives customers the option to choose forest products like paper and wood that have been sourced in an environmentally-friendly, socially responsible and economically viable manner. FSC was founded in 1993 in response to concerns about deforestation. All our wooden stirrers and paper straws have been FSC sourced.

After months of consultations our range of paper straws have now received EN13432:2000 accreditation. This certification specifically focuses on compostability, making sure Utopia's non-metallic paper straws adhere to strict standards concerning biodegrading so they only have a positive impact on the environment. In other words they actually give something back to the earth when their useful life is over.

### Biodegradability...

is a material's capacity to be converted into carbon dioxide (CO<sub>2</sub>) through the action of micro-organisms, under the same process occurring in natural waste.

- Disintegrability, namely fragmentation and invisibility in the final compost (absence of visual contamination).
- Absence of negative effects on the composting process.
- Almost complete absence of heavy metals and the absence of negative effects on compost quality

### Compostability...

is the capacity of an organic material to be transformed into compost through the composting process. This process exploits the biodegradability of the initial organic materials to transform them into a finished product called compost. This allows for the waste to add back to the planet rather than detract from it.

# PAPER STRAWS

All 8" Paper Straws have a bore of 6mm

**Solid Black Straw**  
F90101 8" (20cm)  
24 Boxes of 250
